

MD Kayesur Rahman

Full-stack Developer

+8801926360430 | rmdkayesur@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Dhaka, Bangladesh

Skills

Languages	: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend Frameworks	: React.js, Next.js, Redux Toolkit, RTK Query, Tailwind CSS, Bootstrap
App	: ReactNative, Expo, Eas, Redux Toolkit, * TanStack Query
Backend & API	: Node.js, Express.js, REST API
Database	: MongoDB, Mongoose, PrismaSQL
Authentication & Security	: Firebase, NextAuth, JWT, Cookies
Tools	: Git, GitHub, Figma, Postman, Swagger, Netlify, Vercel, Photoshop
Soft Skills	: Quick Learner, Problem-solver, Self-motivated, Detail-oriented

Projects

❖ IKON SKILLS™ — EdTech Micro-Credentialing & Degree Progress Platform (Frontend) |

Live Demo

Official Production System A premium, high-fidelity Next.js application designed to manage European-standard professional micro-credentialing, map academic pathways, and digitize verified practitioner identities quality-assured by the European International University (EIU), Paris.

- **Verified Practitioner Digital Passport & Identity Vault:** Built a secure digital passport interface that displays accumulated ECTS credits, EQF levels, badges, and certificates. Integrated dynamic visibility state management (toggling between Public Access and Private Mode) and sharing pipelines for LinkedIn, Facebook, and WhatsApp.
- **Dynamic University Degree Progress & Competency Mapping:** Developed an interactive pathway tracking dashboard that maps completed courses against global degree requirements (e.g., Bachelor of Artificial Intelligence). Implemented real-time client-side calculation of mastery percentages, credit counts, and target EQF levels.
- **Immersive AI Integrity Engine:** Created a specialized dashboard showcasing the academic integrity layer which leverages language fingerprinting, knowledge baselines, and behavioral consistency tracking to ensure academic honesty and personalized assessment sequencing.
- **High-Fidelity Document Generation & Certificate Export:** Integrated `html2canvas` and `jsPDF` for dynamic rendering of verified certificates with gold accents, official EIU-Paris signatures, and verification QR codes, allowing practitioners to export print-ready PDF credentials with one click.
- **Advanced State & Cache Optimization:** Configured Redux Toolkit for complex UI states and RTK Query for optimized API interactions, featuring real-time caching, query polling, and seamless transition states.

Note: This project is a proprietary, official production application developed for professional certification and degree progression. Due to company policy, non-disclosure agreements (NDAs), and licensing terms, the source code repository is kept strictly private.

Technology: * Next.js 16, * React 19, * TypeScript, * Tailwind CSS v4, * Redux Toolkit, * RTK Query,

*jsPDF, *html2canvas, *Lucide React, *React Icons, *AOS.

❖ OC REELS — High-Performance Short-Video Reel & Creator Platform (Frontend) |

[Live Demo](#)

Official Production System A premium, high-fidelity Vite + React 18 & TypeScript Progressive Web Application (PWA) designed for short-form video streaming, content creator onboarding, casino affiliate promotions, and real-time administrative moderation.

- **Adaptive HLS Reel Streaming & Media Feed Engine:** Built an ultra-responsive video reel streaming feed utilizing `hls.js` for adaptive bitrate playback, supported by Framer Motion gesture animations, media category filters, interactive rating overlays, and optimized touch interactions.
- **Creator Portal & Application Lifecycle:** Developed an end-to-end creator onboarding system featuring application submissions, real-time approval tracking, creator login authentication, and media publishing workflows.
- **Enterprise Admin & Feed Moderation Suite:** Built a 26+ module administrative management suite with custom feed drag-and-drop reordering, content moderation queues, creator approval management, and detailed user activity tracking.
- **Casino Affiliate & Campaign Management:** Engineered a specialized promotion platform for top casinos with affiliate link tracking, external host management, dynamic rating overlays, and bulk analytics upload modal tools (`Recharts`).
- **Progressive Web App (PWA) & Scalable Redux Architecture:** Configured `vite-plugin-pwa` with custom Workbox service workers for offline caching and seamless app installation, backed by Redux Toolkit and `redux-persist` for robust state persistence across deep route structures.

Note: This project is a proprietary, official production application developed for digital media streaming and creator management. Due to company policy, non-disclosure agreements (NDAs), and licensing terms, the source code repository is kept strictly private.

Technology: *React.js, *TypeScript, *Tailwind CSS, *Redux Toolkit (RTK Query), *HLS.js, *Framer Motion, *Vite PWA, *Recharts, *Firebase, *REST APIs.

❖ RIDESHARE(App) — Real-Time Transport Solution (Fullstack) [Live Demo](#) | [Client Code](#) | [Server Code](#)

Proof A high-performance, real-time ridesharing ecosystem featuring a React Native mobile application and a modular Express backend for seamless booking, tracking, and urban mobility.

- **Real-Time Matching & Live GPS Tracking:** Built a persistent bidirectional communication system using Socket.IO to match riders with nearby drivers and stream GPS coordinates for smooth real-time map rendering.
- **Advanced State & Transaction Management:** Integrated Redux Toolkit and RTK Query for state synchronisation with automatic driver availability updates, alongside Stripe SDK for secure digital payments.
- **Modular API & Role-Based Security:** Developed a scalable Express backend utilising a clean modular architecture with JWT-based authentication, Role-Based Access Control, and strict input validation using Zod.

Technology: *React Native, *Expo, *Eas, *TypeScript, *Tailwind CSS (NativeWind/twrnc), *Redux Toolkit, *RTK Query, *Socket.IO, *Stripe, *Node.js/Express, *MongoDB/Mongoose, *Zod.

🌸 PORTFOLIO(App) — Interactive AI-Powered (Fullstack)

[Live Demo](#) | [Client Code](#) |

[Server Code](#)

A premium, interactive developer portfolio ecosystem featuring a highly polished React Native mobile application and a modular Express backend for real-time AI assistance, project showcase, and secure user engagement.

- **Real-Time AI Chat & Multi-Engine Integration:** Built a persistent bidirectional communication system using Socket.IO, integrating Google Gemini, OpenAI, Anthropic Claude, Groq, and Hugging Face to power an intelligent, real-time AI resume assistant.
- **Advanced State & Secure Clerk Authentication:** Integrated Redux Toolkit and RTK Query for client-side state synchronization, alongside Clerk Auth SDK for secure user registration, email verification, and route protection.
- **Modular Express API & Cloud Infrastructure:** Developed a scalable TypeScript-native backend utilizing a domain-driven architecture with MongoDB Atlas, Nodemailer SMTP routing for contact forms, and Cloudinary for dynamic media uploads.

Technology: * React Native, * Expo, * TypeScript, * Tailwind CSS (NativeWind/twrnc), * Redux Toolkit, * RTK Query, * Socket.IO, * Clerk Auth, * Node.js/Express, * MongoDB, * Cloudinary, * Nodemailer, * Google Gemini, * OpenAI, * Anthropic Claude.

Education

National University of Bangladesh, Dhaka, Bangladesh.

Language

Bangla (Native), **English** (Intermediate)
